When the Employer is putting up the job they would have the option of choosing how they wanted to received applications. Eg it would be “Either Send CV and Cover letter Now” or “Yes I am interested” this is because it makes it easier for staff and less paperwork for Business if they choose the Yes I am interested as they all have their internal processes.

Please remove “Home / Work Detail”

Please can you change “Duration of job” to “Approx Duration of Job”

Can we add “Contract type” -where “other benefits” This would pull through from the page that the employer would fill in all the details.

With the “other benefits” if there is more than two or three can it be an expandable list by pushing an arrow.

This would be a drop down list to select from which would show , “Casual”, “fixed term” “contract rate”
