Find work pages changes.
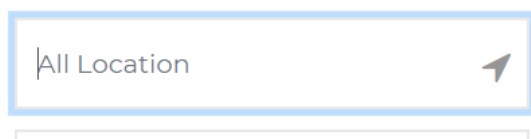

http://mactosys.com/seasonal-job/find-work.html

Can this be changed from "Name" to "Key word search"... so that the person looking for work can refine their search further

Can this just be changed from " All location" to "location" please.

****Could you also confirm that if they put another location in this box does it automatically refine the search when they press enter or will the person need to push a search button again.?

I am thinking it might be a good idea to add a search button on the bottom so they push to refine the search further.

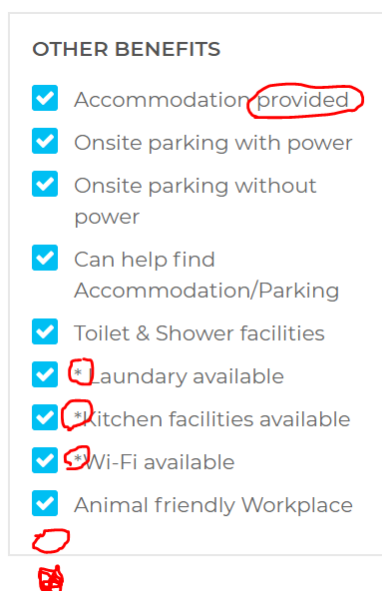

Can you please change "Accomodation provided" to "Accommodation available"

Please remove the *

Please add another box below "animal friendly work place" to say "Other"

Where I have put a big red astrix down the bottom can in brackets a note be put to say "Charges may apply"

Please also put a Big blue search button under here please

Under the logo would be where the rating would be. However if the Employer or the Employee does not want to have people rate them can no stars show. We only want the stars showing if the Employer has agreed that they can be rated.

Can you changed "Duration of Job" to "Approx Duration of Job"

Can "Hours per week" be changed to "Approx Hours per week"

The hours per week need to be expressed has a number of hours (we mentioned this in a previous update.)

Where we have marked "Approx, hours per week" this needs to list the additional benefits that the employer selects. Eg non powered parking, Laundry Wifi etc.
