Customer Relationship

We are committed to our values. **As one of the most responsible Web, Mobile Development and SEO companies, we do not mislead our customers with ambiguous or any false promise. If we feel like we cannot help you, we will let you know by respectfully declining your project.** But if we take the responsibility, it becomes our sole mission to deliver the work on time with 100% commitment. We believe in maintaining long-term relationship with our clients and thus, we put every possible effort to satisfy them with our work.

The business value of the company is to focus on Human Values and Personal Relations. Major emphasis is laid on good communication, lucidity and human relations, which forms the very basis of the corporate culture. At Mactosys, we not only grow up products, but also we develop a healthy relationship.

Some of Our Valuable Clients

1. Introduction

Client wants to develop a Application Jobs Board Website for seasonal Jobs. It will be Open for General Public

1.1. Background

Website will be focused on job posting and applying, notification and filters Website design will be fully mobile responsive.

1.2. Scope of Work

- Design & Development of Responsive Website
- Admin Login
- Employer Login as per access level
- Innovative & Intuitive Dashboard for Employee **and Employers**
- Jobs posting and applying.
- Filter for searching jobs
- Notification for subscribed job
- Customizable Reporting

1.3. Requirements

- Admin can Manage jobs posted.
- Both Admin & User can use various Features to manage their Web Account.
- Admin can generate Various Reports based on the Data Submitted.
- Jobs search based on location, Months , Jobs Categories **and skills**
- User can take membership plan however registration on website will be free (This was not discussed- We are want to be able to have the option of being free but intend to cost members)
- User can mange profile with related information.
- User can provide feedback to each other. Can you please clarify this - is this by way of review or chat feature? Yes this review
- Admin can write blog.
- Admin can add special offer.
- Admin can edit drag and drop feature
- Admin can create and manage membership plan
- Job and employees location can view on map
- Ads space on website (Google ads) can be monitored

2.   Employer section
- They can forcast out when they are going to have seasonal staffing vacancies or
- shortages and plan them and advertise them ahead of time, and receive expressions of interest from potentially skilled or interested workers.
- They can hide or unhide listings if needed
- They can put multiple job ads in either at a cost per job, or for a monthly or yearly subscription.
- Employers can search for people looking for work and area in the area and make contact with them or look for staff with key skills and make contact with them.
- Employers can create a profile (where staff can give feedback on employers – eg
- several
- Employers can send automated responses to back to people who contact them.
- Employers can create their own profile.
- Employers can create a list of key skills they are looking for and receive alerts.

- Have a drag and drop function where it is easier for employers to select the skills
- they are looking for, or months they are needing workers

- When an employer receives an "expression of interest" notification by email, the
- email contains a link to the persons profile so they can click on it and see more about them quickly.
- Employers can promote and have push function to email prospective employers (this would be a paid feature)
- When looking at sending a message to a employee a template can be set up from
- what you are writing. (short template message that Employer / Employee can it to personalise to advise that they are interested in job/ working
- Make ads Featured.

3. Jobseeker(Employee)
- Jobseekers can plan out work ahead of them by see what jobs are available in what areas or in what months and send expressions of interest to employers with their profile attached, they can also advertise that they are looking for work, month, etc OK. Here we can ask employee to pay as per featured plan
- They can edit their profile and update their location multiple times to reflect where they might be currently.
- They could subscribe for a month or a year depending on work requrements.
- Jobseekers can search for work and area by month and make contact with them
- look for employers that need key skills.
- Jobseekers can create a profile (where employer can give feedback on employees
- Jobseekers can send automated responses to back to Employers who contact them.
- Employee can create their own profile.
- Employees can promote and have push function to email prospective employers (this would be a paid feature) Is it on on posted job or employees send email from employer profile?
- Have a drag and drop function where it is easier for employers to select the skills

- they are looking for, or months they are needing workers
- Jobseekers can create a list of key skills, which month they are looking for work and
- locations they would like to work in and have and alerts sent to them when a job add
- is posted that meets their criteria.
- When a jobseeker receives an "expression of interest" notification by email, the
- email contains a link to the business or job profile so they can click on it and see
- more about them quickly.
- When looking at sending a message to a employer and template can be set up from
- what you are writing. (short template message that Employer / Employee can it to personalise to advise that they are interested in job/ working

4.   Compliance

Phase wise Approval & Payments will ensure that Work is on right Track and as per Schedule. We'll mutually agree for Milestones.

5.   Project Deliverables

Milestone 1:

Mactosys Software Solution Pvt. Ltd.
www.mactosys.com

1. Website mockup with employee and employer dashboard (agree)

Milestone 2

1. Mockup HTML Preparation for Employer Login
2. We'll Provide All Screens with Dummy Data, Buttons and Links will be clickable to get the understanding of complete flow. (Agree)

Milestone 3

1. Mockup HTML Preparation for Employee Login
2. We'll Provide All Screens with Dummy Data, Buttons and Links will be clickable to get the understanding of complete flow. (This is the same as the previous milestone how does it vary?) This is admin panel design
3. Employers can create their own profile.
4. They can forcast out when they are going to have seasonal staffing vacancies or
5. shortages and plan them and advertise them ahead of time, and receive expressions
6. of interest from potentially skilled or interested workers.
7. They can hide or unhide listings if needed
8. They can put multiple job ads in either at a cost per job, or for a monthly or yearly
9. subscription.
10. Jobseekers can plan out work ahead of them by see what jobs are available in what
11. areas or in what months and send expressions of interest to employers with their
12. profile attached.
13. is there meant to be something here? this was blank? Ignore this line
14. They can edit their profile and update their location multiple times to reflect where they might be currently.
15. They could subscribe for a month or a year depending on work requrements.

16. Jobseekers can search for work and area by month and make contact with them

(I would like a bit more clarification on this sector please before I agree also to add in the other parts I have highlighted in red.
Yes we can add this feaured you mentioned

Milestone 4 :

1. Employers can search for people looking for work and area in the area and make
2. contact with them or look for staff with key skills and make contact with them.
3. Employers can create a profile (where staff can give feedback on employers – eg
4. several
5. Employers can send automated responses to back to people who contact them.
6. Employers can create a list of key skills they are looking for and receive alerts.
7. Have a drag and drop function where it is easier for employers to select the skills
8. they are looking for, or months they are needing workers
9. look for employers that need key skills.
10. Jobseekers can send automated responses to back to Employers who contact them.
11. Employers can create their own profile.
12. Have a drag and drop function where it is easier for employers to select the skills
13. they are looking for, or months they are needing workers
14. Jobseekers can create a list of key skills, which month they are looking for work and
15. locations they would like to work in and have and alerts sent to them when a job add
16. is posted that meets their criteria.
17. When an jobseeker receives an "expression of interest" notification by email, the

18. email contains a link to the business or job profile so they can click on it and see

(I would like a bit more clarification on this sector please before I agree also to add in the other parts I have highlighted in red.

Milestone 5:

1. Complete Integration
2. We'll integrate Admin & Employer, Employee
3. QA: Will do Complete Testing (will be also be able to test? during this faze? - would like this clarified before agreeing

   Yes, you can do test on and after your feedback we will implement
4. Client Review & Feedback
5. Feedback Implementation
6. And live launch

7. Assumptions

1. Payment Gateway will be provide and all charge will be beard by client if any. *(please can you give an estimate of cost - before agreeing)* If we use paypal it's free

2. System will NOT be Extracting/Reading any data from any 3rd Party Website *(please can you clarify further)* This point state that system will not scrape any data from another website

3. System will not be Integrated with any other website *(we want this to be able to interact with Facebook twitter etc?) does this exclude these?* We will have like share login option

4. System will provide Excel/XML Import/Export Feature. *(please can you clarify further)* ignore this

5. We'll NOT be doing any Data Entry, *(please can you clarify further)*
   Data entry mean will not write content, we will make system to show it on website.

8. Technology   Open source means it free to use not paid

1. System will be development in Open Source ,LAMP. *(please provide robust reasoning for this, we want to ensure that we are future proofing the capabilities if this needs to be developed further)*

2. We'll use MVC Architecture for Admin which is best supported by CodeIgniter(3.x) *(please provide robust reasoning for this, we want to ensure that we are future proofing the capabilities if this needs to be developed further)* Codeigniter is opps based framework follow MVC architecture to manage coding. It's easy to extend and add feature. future

3. will be MySQL *(can you please help us understand what is meant by this?)*

4. Hybrid development for Android and iOS yes   I am sorry, not stand for mobile app. it's mean website will be mobile responsive

5. HTML 5.0 and CSS 3.0 will be used
(please provide robust reasoning for this, we want to ensure that we are future proofing the capabilities if this needs to be developed further)

Note:- Native mobile app development will cost 1000 USD extra What is meant by this and why? please provide robust reason as to why this is needed It's not it's added by mistake

HTML and CSS will be use for desiging of website layout is designing language. We will also use Bootstrap for Responsive website design.
